SUMMARY

I am an observant full stack developer that learns quickly by identifying patterns in new material. My experience in biotech has taught me the importance of flexibility and the mindset to break concepts down into testable pieces. I make every hour happy hour and bring a balance of fun and serious work ethic to any team.

SKILLS

TOOLS: HTML, CSS, JavaScript, JQuery, Node.js, Express.js, Angular.js, SQL, Postgres, MongoDB, Mongoose, Sequelize, Sublime Text 3, Web APIs, Git/Github, Bootstrap, Materialize, Ruby, Rails

ABILITIES: Troubleshooting, Teamwork, Communication, Flexibility, Positivity, Organization, Self-Reliance

PROJECTS

Chronotron

Jun 2017

Technologies: HTML5, CSS3, JavaScript, JQuery, Ruby on Rails, Youtube API, Trails API, Spotify API, Open Trivia API, Open Weather API, Google Analytics

Give Chronotron an amount of time you need to spend and it will provide you enough content to fill that void. This project was created by a 5 person dev team working with 1 UX/UI Consultant. My responsibilities were the music section, the homepage and side navbar logic, deployment, troubleshooting, and implementing suggestions from the UX/UI consultant.

Doggleganger

May 2017

Technologies: HTML5, CSS3, JavaScript, Angular.js, Node.js, Express.js, MongoDB, JWT, Petfinder API, GraphicsMagick's npm module

Doggleganger allows you to search for the perfect pet based on your percentage look-alike match. This was a three-person group project, and I was primarily responsible for the image comparison features and shared responsibility on Angular.js implementation.

Find Happy

May 2017

Technologies: HTML5, CSS3, JavaScript, JQuery, Node.js, Express.js, Google Map + Geocode APIs, Yelp API, Sequelize, PostgreSQL

Find Happy is a combined address book and Yelp search app. Users can preload addresses and save fun locations around that area! Perfect for travel planning.

Browsergotchi

Apr 2017

Technologies used: HTML5, CSS3, JavaScript, JQuery, GIMP

Based on the tamagotchis of the 1990s, Browsergotchi is a game where you feed a pet and gain experience points. The higher your experience points, the better food and accessories that you can unlock!

TECHNICAL EXPERIENCE

Web Development Immersive

GENERAL ASSEMBLY, Mar 2017 - Jun 2017

Accelerated project oriented learning - 70+ hours per week over 3 months.
Practiced DRY coding and RESTful routing with CRUD operations.
Worked individually and as a team to develop full-stack web applications.
Kept a positive attitude while tackling challenging material.

Clinical Research Associate - Molecular Analysis / QC Lead

HEMATOLOGICS INC., Nov 2014 - Feb 2017

Worked within an interdisciplinary team to coordinate clinical testing and prioritize STAT cases.
Developed technical protocols and managed version control.
Identified redundancies in the procedure manual and transferred the entire library of documents into Sharepoint.
Troubleshot issues in both the existing production pipeline and new materials.

Molecular Technologist II / Quality Assistant

GENELEX CORPORATION, Sep 2011 - Nov 2014

Performed high throughput clinical DNA testing.
Managed purchasing and quality control Access databases.
Designed technical data organization and inventory tracking documents.
Implemented CAP quality control standards into procedure manual.

EDUCATION

GENERAL ASSEMBLY
